

# World AIDS Day

**DECEMBER 1, 2020**

World AIDS Day was the first-ever global health day. Every year, it takes place to help **educate** others on AIDS, **spread awareness**, and **commemorate** those that have passed due to AIDS-related illnesses.

**Over 38 million people are living with AIDS worldwide.**

HIV continues to have a significant impact on certain populations, specifically racial and ethnic minorities and gay and bisexual men.

Many people do not know the facts about how to protect themselves and others from HIV due to the stigma and discrimination around people living with the condition.

## Human Rights Day

**DECEMBER 10, 2020**

Human rights are rights we have simply because we exist as human beings. These universal rights are inherent to us all, regardless of nationality, sex, national or ethnic origin, color, religion, language, or any other status. They range from the most fundamental; the right to life, to those that make life worth living, such as the rights to food, education, work, health, and liberty.

**End discrimination of any kind:**

Structural discrimination and racism have fueled the COVID-19 crisis.

**Address inequalities:**

To recover from the crisis, we must also address the inequality pandemic. For that, we need to promote and protect economic, social, and cultural rights.

**Encourage participation & solidarity:**

We are all in this together. Everyone has a role in building a post-COVID world that is better for present and future generations.
